

removal of "send files to:" field

Posted by dunc_b - 2010/03/09 13:50

If you installed this for a company that wanted users to be able to send files to them only could you remove the field 'Send File(s) to:' and set it up to only go to a specific email.

Users should only be able to send files to the company not anyone else.

Thanks...

D
